

The effect of indexation on your pension

Revenu de la pension
de la fonction publique

Effects of indexation on your pension, more.....

For example, if you retire at age 65 with an annual pension of \$31,166.25 and the inflation rate is :

- 1% per year (which means your pension would increase by 1% each year): :
 - The following year, at age 66, your pension would be \$31,477.91.
 - 1% per year (which means your pension would increase by 1% each year):
 - The following year, at age 66, your pension would be \$31,477.91.
 - Ten years later, you would receive: \$34,426.93.
- 2% per year (which means your pension would increase by 2% per year):
 - The following year, at age 66, your pension would be \$31,789.58.
 - Ten years later, you would receive: \$37,991.48.2 % par an.
